Santiago de Querétaro, Querétaro.

ABOUT ME

Mechatronics engineer with automotive industry experience, passionate about programming, capable of solving all kinds of issues and give innovative solutions, always open to work as a team and willing to take feedback maturely.

TECH STACK

- Java.
- Python.
- DBMS (MySQL).
- JUnit.
- HTML5.
- CSS3.
- Flutter
- Bootstrap.
- JavaScript.
- ReactJS.

OTHER SKILLS

- Leadership.
- Teamwork.
- Open to feedback.
- Problem solving innovation.
- Fluent English.
- Agile methodology.

WORK EXPERIENCE

SYSTEMS ENGINEER TRAINEE

INFOSYS | NOV 2021 – PRESENT

- Foundation program Jan 2022:
 - Java: Programming basics, OOP, Data Structures & Algorithms.
 - Data Base Management Systems (MySQL).
 - JUnit testing.

MANUFACTURING INTERN: ASSEMBLY LINE

NEXTEER AUTOMOTIVE | NOV 2020 – OCT 2021

- Production line knowledge: Fault support and diagnosis
- Tooling and part designs for production processes.
- Programming, design and correction of artificial vision software (Cognex, Keyence and IFM sensors).
- Manufacturing documentation writing. (Standard Work Instructions, Error Proofings, Calibration Sheets, MPS)
- Tasks automation on Python.

EDUCATION

INSTITUTO TECNOLÓGICO DE CULIACÁN

MECHATRONICS ENGINEERING | 2015 – 2020

SPECIALTY: AUTOMATION AND ROBOTICS.

- Participant: "Robobatalla 2017".
- First Place: "Evento Nacional de Innovación Tecnológica" (ENEIT).
- Mechatronics fair participant: Artificial vision system on Python applied to tomatoes color based classification.

COURSES AND CERTIFICATIONS:

- First Certificate in English B2 – Cambridge Assesment English.
- PLC from scratch (Paul Lynn).
- Crash Course on Python (Google).

OTHER PROJECTS:

- Password locked door via PIC16F877A (C Programming)
- Temperature room control via PIC16F877A (C Programming)
- Heat control for food industry processes.
